

COMTEK® ALS-216 Personal Trainer

A Close-Up On Sound®

Experience the advantages of crystal clear sound with the ALS-216 Personal Trainer.

Used by top trainers and riders all over the world, this system allows trainers to communicate with riders over long distances with perfect speech clarity.

Simple to use, the trainer wears the M-216 personal transmitter and lapel

microphone, and the rider wears the PR-216 personal receiver and earphone. The rider can be as far away as 300 ft. and not miss a single word! What's more, with additional receivers, multiple riders can monitor the trainer at the same time. Plus, its rugged construction ensures

long-lasting durability in even the most demanding environments.

The Complete ALS-216 Includes:

- M-216 Option 1 Transmitter
(Includes a microphone-mute switch)
- PR-216 Personal Receiver
- CM-183 Omni-directional Lapel Microphone
- WM-183 Microphone Windscreen
- Left & Right Mono Headphone Sets
- C-216 Carrying Case

Optional rechargeable batteries and battery charger shown in kit.

ALS-216 Optional Accessories:

HM-100C

This uni-directional, headworn microphone reduces background noise while offering convenient, hands-free operation.

HH-185

This uni-directional, plug-in boom microphone adapter allows the M-216 transmitter to be used as a handheld-type wireless microphone while blocking out background noise.

PR-216 Option 7 Receiver

This unique receiver can be mounted on a powered speaker to create a portable wireless PA system and can be used simultaneously with the ALS-216 system. Perfect for clinics, shows, and special events, both the rider and the audience can hear the trainer without the need for a second wireless microphone system.
